Inventory scientific papers of Johan van Benthem, professor of logic

Introduction

Topic of the papers

Johan van Benthem (born 12 June 1949, http://staff.fnwi.uva.nl/j.vanbenthem) is a logician who has worked at the universities of Amsterdam (1972–1977, 1986–2003, University Professor 2003–2015), Groningen (1977–1986), Stanford (1991–present, Henry Waldgrave Stuart Chair since 2003) and Tsinghua Beijing (2007–present, China National Changjiang Professor 2013–2016). His academic education includes a bachelor's degree in physics (1969), master's degrees in philosophy (1971) and mathematics (1972), and a doctoral degree in mathematics (1977). His research and teaching cover pure and applied logic and its interfaces with mathematics, philosophy, linguistics, computer science, cognitive science and economics. He has worked mainly in modal and temporal logic, logic and epistemology/philosophy of science, logical semantics and syntax of natural language, logics of space, dynamic logics of information, computation and communication, and interfaces of logic and game theory. He has published some 500 articles in professional journals and books, edited some 10 scholarly books in various fields of logic, and supervised some 75 Ph.D. students. Monographs: *The Logic of Time* (Kluwer 1983), *Modal Logic and Classical Logic* (Bibliopolis 1985), *Essays in Logical Semantics* (Kluwer 1986), *Language in Action. Categories, Lambdas and Dynamic Logic* (Elsevier Science 1991), *Exploring Logical Dynamics* (CSLI Publications 1996), *Modal Logic for Open Minds* (CSLI Publications 2010), *Logical Dynamics of Information and Interaction* (Cambridge University Press 2011). Editor of the *Handbook of Logic and Language* (1997), *Handbook of Modal Logic* (2006), *Handbook of Spatial Logics* (2007), *Handbook of the Philosophy of Inform*ation (2008), and numerous logic journals. Co-author of several textbooks, including *Logic, Language and Meaning, Logic for Computer Scientists,* and *Logic in Action*. Founding director of the Institute for Logic, Language and Computation (ILLC, University of Amsterdam, 1986–1998), first chair of the European Foundation for Logic, Language and Information (FoLLI, 1989–1995), and chair of the first Dutch national research program in cognitive science (2001–2004). He is a member of the Academia Europaea (1991), the Royal Dutch Academy of Arts and Sciences (1992), the Institut International de Philosophie (2001), the Hollandse Maatschappij der Wetenschappen (2002),

and the American Academy of Arts and Sciences (2015). In 1996, he received the Spinoza Prize of the Dutch National Science Organization NWO for his total research, and in 2014, the Order of the Dutch Lion for lifetime achievement.

A complete CV and a scientific autobiography can be found in the materials below. This archive, further described in what follows, contains the scientific and professional documents of Johan van Benthem for the period up until the summer of 2017.

Preparation of the papers

The original material consisted of 25 numbered boxes starting around 1967, books and papers and electronic materials in other locations, plus documents stored in an office at the ILLC, University of Amsterdam, Science Park. The total size was around 25 meters. This has been reduced to some 6.5 meters, according to the procedure described below. The main focus throughout in the selection was on research and teaching, with some broader organizational activities as a supplement to complete the picture of activities.

A very strict selection has been made of available documents concerning the personal educational trajectory (school and university exams, materials around the dissertation and defense ceremony), as well as appointment papers, certificates for awards and honors, and material documenting more personal milestones, such as jubilees.

For publications, an informative selection has been made of: final manuscript (in the form of a reprint where available), one or at most two earlier manuscripts, correspondence with publishers, relevant correspondence with colleagues or students prior to or after publication. Not included are referee reports (which were very incomplete in the original archive), or subsequent official reviews. For monographs and textbooks (but not for edited books), the actual published volume has been added to the archive. Also not included, except when highly relevant, are prepublication reports on research.

The archive contained large numbers of private notes with ideas and possible projects: only a representative selection has been kept. Thirteen notebooks (1967–1983) with mixed personal and academic content have been placed in a private family archive. In addition, a number of larger incomplete projects for papers, books, and other scientific projects has been collected in chronological order under the heading 'Unfinished'.

The correspondence has been trimmed considerably to retain only letters and printed emails (where available) with scientific topics. Personal or organizational messages between colleagues have been removed, and likewise, small matters such as requests for reprints or general announcements for academic activities. Also removed were

academic recommendation letters written over the years for students and colleagues, and all correspondence of an organizational-administrative nature. (Many of these materials should be available in the archives of the relevant academic institutions.)

For courses taught, a selection has been made of announcements, correspondence, and test or exam materials. Moreover, all available lecture notes are present in the archive. For specific students supervised for master's theses and doctoral dissertations, a selection has been made of characteristic correspondence. These theses and dissertations themselves can be found in university archives.

For conference lectures, seminar presentations, or public talks, announcements have been kept, plus handouts, and materials such as correspondence relevant to the event.

For editorial work on special volumes or Handbooks, only a small selection has been made, including contracts, publicity items, relevant correspondence with publishers, and some characteristic correspondence with authors. Editorial work for journals is only listed, as detailed correspondence with contributing authors was not available.

For workshops and other events organized, a selection has been made of relevant materials, mainly original proposal texts if available, and the final programs.

Material concerning academic organizational activities was scarce in the archive to begin with, presumably because these documents are usually also available in the public domain for the relevant institutions (institutes, departments, universities, scientific funding agencies). What was available has largely been kept here, including original documents and some correspondence concerning the founding of the ILLC, the European foundation FoLLI, major projects such as the Dutch national cognitive science program, or international scientific initiatives. The archive contained no materials at all about standard academic activities such as memberships of committees of various sorts, tenures as dean of philosophy, mathematics and computer science, or the day to day running of various scientific projects. Even so, the materials present here do give a representative outline of the broader organizational and financing context for the individual research and teaching that is the main focus of this archive.

Finally, starting around 2000, and increasingly through the years, many items are only available in electronic form without prints, such as correspondence, earlier versions of published articles, or organizational materials. Electronic files with supplementary material for the period until the summer of 2017 have been added to this archive.

Organization of the papers

This archive has been arranged in an 'inside-out' manner, from personal items through activities in close-range scientific collaborations to broader academic organization and eventually to public outreach. Sections 1–5 contain personal information about career, education, employment, major memberships, awards and distinctions, personal milestones, as well as legacy events and materials. Sections 6–11 document scientific publications: books, edited books, articles in journals, articles in books, conference proceedings, and reviews. Sections 12–13 contain official conference talks as well as a selection of major seminar talks. Section 14 is academic correspondence about ongoing research and public presentations. Sections 15–19 document teaching and supervision of students: regular and incidental courses, official lecture notes produced for these, as well as master's theses and dissertations supervised. Section 20 contains editorial activities for international academic journals. Sections 21–23 have individual research projects and funding proposals, organization of scientific events, as well as general organizational activities of a scientific nature. Sections 24–26 contain articles and talks for general audiences, as well as outreach to a general public through newspaper interviews and other channels. Section 27 collects unfinished projects, of which the archive material contained quite a few. Section 28 contains speeches on the occasion of dissertation defenses or other academic events, obituaries, and a few remaining true varia with some academic connection. Finally, Section 29 has supplementary electronic materials for the above, where relevant, plus videos of lectures and a documentary.

15   Teaching: regular courses

15.1   Regular courses in Amsterdam, Stanford, Beijing and Vancouver

569–719   Announcements, lecture materials for students (handwritten and printed), general and individual exams, student clubs, 1972–2017

569   Inleiding Logika, UvA, 1972

570   Verzamelingenleer, UvA, 1973

571   Logika II, UvA, 1974

572   Induktieve Logika, UvA, 1974

573   Modale Logica, UvA, 1974

574   Logica in Vogelvlucht, UvA, 1975

575   Inleiding Filosofische Logica, UvA, 1976

576   Logica Programma, UvA, 1976

577   Modal Logic and Relational Properties, UvA, 1976

578   Wijsbegeerte en Wiskunde in de Griekse Oudheid, UvA, 1977

579   Logica II, UvA, 1977

580   Logica in Vogelvlucht, RUG, 1977

581   Wiskundige Logica, RUG, 1978

582   Logica, RUG, 1978

583   Intensionele Logica, RUG, 1978

584   Geschiedenis van de Axiomatische Methode, RUG, 1978

585   Argumentatieleer en Geschiedenis van de Logica, RUG, 1978

586   Wiskunde voor Filosofen, RUG, 1978

587   Logica, RUG, 1979

588   Semantiek, RUG, 1979

589   Wiskundige Logica, RUG, 1979

590   Tijdslogica, RUG, 1979

591   Modeltheorie, RUG, 1979

592   Formele Methoden in de Wetenschapsfilosofie, RUG, 1979

593   Inleiding Wijsbegeerte, RUG, 1980

594   Logica in Vogelvlucht, RUG, 1980

595   Modeltheorie, RUG, 1980

596   Semantiek, RUG, 1980

597   Wiskundige Logica, RUG, 1980

598   Modeltheorie, RUG, 1981

599   Tijd, Ruimte, Causaliteit, RUG, 1981

600   Wiskundige Logica, RUG, 1981

601   Logica in Vogelvlucht, RUG, 1981

602   Inleiding Semantiek, RUG, 1981

603   Conditionals, Counterfactuals, Causaliteit, RUG, 1982

604   Onvolledigheid en Onbeslisbaarheid, RUG, 1982

605   Categoriëen en Topoi, RUG, 1982

606   Modeltheorie, RUG, 1982

607   Wetenschapsstructuur, RUG, 1982

608   Logica, RUG, 1983

609   Verzamelingen en Modellen, RUG, 1983

610   Theoretische Informatica, RUG, 1983

611   Geschiedenis van de Logica, RUG, 1983

612   Tense, Logic and Time, SFU Vancouver, 1983

613   Linear Algebra, SFU Vancouver, 1983
