Dankwoord **ix**

1 Introduction **1**

2 Preliminaries **7**
2.1 Computational Models 7
2.2 Decision Problems 9
2.2.1 The class NP 11
2.2.2 Quantifying over witness-schemes 14
2.2.3 The Reductions $\leq_{wi\exists\exists}$, $\leq_{wi\forall_r\exists_\ell}$, $\leq_{wi\forall\forall}$ and $\leq_{wi\exists_\ell\forall_r}$ 15
2.2.4 The Reduction $\leq_{wi\exists_r\forall_\ell}$ 16
2.2.5 $\leq_{wi\forall_\ell\exists_r}$-Reducibility 17
2.2.6 $\#P$-completeness 19
2.3 Optimization Problems 20
2.3.1 Approximation 21
2.4 Local Search 26
2.4.1 Definitions 27
2.4.2 Reductions on PLS 28
2.4.3 MinTSP 32
2.4.4 Empirical results 41

3 Starred Versions **45**
3.1 Introduction 45
3.2 NP-completeness 47
3.3 Generalization 53
3.4 P-results 54
3.5 The Quality of Locally Optimal Solutions 56

4 The Witness Isomorphic Reduction **59**
4.1 Introduction 59

4.2 Comparing Solution Sets of Local Search Problems 59
4.3 Standard *NP*-complete problems 63
4.4 WI-Reductions 69
4.4.1 Introduction 69
4.4.2 WI-Reduction to $(MaxSat^*, R_{MS})$ 69
4.4.3 WI-Reduction to $(MinPartition^*, R_{MP})$ 70
4.4.4 Other WI-reductions 76
4.5 A Non WI-Reduction 78
4.6 Conclusion 79

5 TSP **81**
5.1 Introduction 81
5.2 A WI-Reduction to $(MinTSP^*_{2Opt}, R_{MTSP_{2Opt}})$ 81
5.2.1 Introduction 81
5.2.2 The vertices in G 83
5.2.3 Tours in G 85
5.2.4 The weights of the edges in G 87
5.2.5 Intuition 89
5.2.6 Augmenting Paths in $G_{MTSP_{2Opt}}(G)$ 91
5.2.7 Mainresult 100
5.3 Simulating a space-bounded Turing Machine 100
5.3.1 Introduction 100
5.3.2 The vertices in G 102
5.3.3 Tours in G 105
5.3.4 Intuition 109
5.3.5 Augmenting paths in $G_{MTSP_{2Opt}}(G)$ 110

6 Conclusions **121**
6.1 Introduction 121
6.2 Preliminaries 122
6.3 The *lssp*-reduction 124
6.4 Complexity Classes 125

A Decision Problems **127**

B Optimization Problems **131**

Bibliography **139**

Samenvatting **143**
